

# Lasers, Optics and Photonics World Forum

April 21-23, 2022, Porto, Portugal

[Abstract Submission](#)[Registration](#)

## About The Conference

Optics and Photonics are technical enablers for many areas of the economy, and dramatic technical advances have had a major impact on daily life. In the last decade, advances in optical fiber communications have permitted a nearly 100-fold increase in the amount of information that can be transmitted from place to place, enabling a society-transforming Internet to thrive. Without optics, the Internet as we know it would not exist.

In order to address the developments and to share recent research of researchers around the world Continuum Forums is organizing **Lasers, Optics and Photonics World Forum** which will be held during **April 21-23, 2022** in **Porto, Portugal**.

Lasers, optics and Photonics are rapidly evolving and play a prominent role in industrial, medical defense and scientific research applications. Especially in the medical device space, they are considered as the next big thing making world
